Elite1 Recruiting & Evaluations

All players will have access to the Elite1Recruiting & Evaluation Service. We have access to a huge network of prep school, college and professional coaches and scouts. With Elite1Recruiting & Evaluation Service you are assured the greatest opportunity to be seen and get to the next level.

With players being recruited to the next level based heavily on rankings, the recruiting process has become increasingly difficult for both players and coaches to identify the athletes that don't make the ranking charts and are talented enough to receive scholarships or professional contracts. This leaves athletes who are not on player ranking charts having to actively search for connections with coaches and scouts. Elite1Recruiting & Evaluation Service gives all athletes an opportunity to be evaluated and recruited, ensuring that no deserving athlete gets left behind.
